Application No.

Continuation of 11. does NOT place the application in condition for allowance because: The fact remains that the term "breathablity" is not found nor addressed in the specification. The only element addressed by the Applicant relates to a mask that is permeable neither the degree to which the mask is permeable nor the ability to provide "sufficient air for breathing". The issues at hand are the meaning of the word "breathable", the definition of the phase "sufficient air for breathing", and the required pressure gradient. The prior art Niemeyer is a permeable and breathable mask, (Column 5, Lines 9-12) and inherently this mask provides a pressure gradient. Being that the mask is permeable, breathable, and has a pressure gradient, though difficult, a person can breathe through the mask and be provided with air sufficient to breathe. Please see the advisory action Mailed 3/30/09.
